

# Gifted Math Program

## Information and Registration

### What is the Gifted Math Program?

**Gifted Math is designed to provide challenging mathematics for students at the elementary and middle-school level who need greater depth and breadth in their approach to learning mathematics. The Gifted Math program is a combination of online learning and classroom seminars. The first year curriculum covers the seventh grade Connected Math Program (CMP). The second year is our Gifted Algebra 1 course. The curriculum uses a combination of the eighth grade Connected Math Program (CMP) and the Key Curriculum Press Discovering Algebra textbooks. The third and fourth year; Gifted Geometry and Gifted Algebra 2; are taught from the Key Curriculum Press Discovering Geometry and Advanced Algebra textbooks. Each course aligns with the MN Graduation Standards.**
