Hennepin Technical Pathways Courses available at Hennepin Technical College

Intermediate District 287's Career Courses focus on career skill development experiences and exploration.

CAREER COURSES

Career courses are designed to assist students in making career decisions. Hands-on instruction is emphasized. Each course offers a broad array of information from similar careers within an industry. From here, students could branch off into a major for their college career choice.

Class activities will include:

- Exposure to equipment and practices representative of current technology
- Lab projects designed to “put it all together”

Students will:

- Gain an understanding of the opportunities available within their chosen career cluster
- Develop a foundation of technical knowledge and skill development
- Acquire a deeper understanding of each related college major and how it matches their interests, abilities and aspirations
- May earn articulated college credit through HTC or other Post-Secondary Institutions by satisfactorily completing the course requirements and by obtaining a grade of an A or B

Courses are scheduled to meet for approximately two hours during the school day, Monday through Friday. Students should see their high school counselor for additional information.

Classes: 8:00 – 9:40 a.m.

10:00 – 11:40 a.m.

12:10 – 1:50 p.m.

Culinary Arts Careers

Culinary Arts – Fall Semester

EPC – 10:00 a.m. and 12:10 p.m.

This course is intended to introduce students to a variety of careers in the food service industry. Students will experience a number of career areas through both technical and hands-on skills. Employment opportunities and career advancement will be discussed and explored. Food preparation experiences will range from the very basic to gourmet. Students will also explore some specialty career areas within the food service industry.

Areas of Study:

- Introduction to the food service industry
- Safety and sanitation
- Reading and conversion of recipes
- Bakery production
- Pantry production
- Plate/platter garnishing
- Restaurant management/food cost controls
- Preparation of stocks, sauces, and soups
- Appetizers, canapés, hors d'oeuvres

Note: There is a lab fee for this course.

Culinary Arts Careers

Culinary Arts – Spring Semester

EPC – 10:00 a.m. and 12:10 p.m.

This course offers a more advanced level of culinary training tailored to the standards of the culinary industry. Students will be expected to perform at entry-level industry standards. Hands-on activities are about 70 percent of the coursework.

Areas of Study:

- Introduction to breakfast cookery
- Introduction to range food cookery – vegetables and starches
- Range food cookery techniques – meats, poultry, fish and seafood
- Introduction to multicultural cuisine
- Introduction to cake decorating techniques
- Introduction to ice sculpting techniques
- Introduction to meat fabrication
- Advanced baking techniques

Note: There is a lab fee for this course.

Culinary Arts Careers

Cooking for Independent Living – Fall or Spring Semester

EPC - 8:00 a.m.

(No articulated credit is available for this course.)

This course introduces the student to basic food preparation skills for use in the home setting as well as on the job. The student will learn to prepare balanced meals with emphasis on nutrition and economy. This course is designed for students who are developing transition skills.

Students who continue in the Spring Semester will build on skills learned Fall Semester, increasing their level of independence.

Areas of Study:

- Menu planning
- Economy - budgeting
- Nutrition
- Sanitation and safety
- Measurements
- Food preparation skills
- Shopping for food
- Knife skills
- Full meal preparation

Note: There is a lab fee for this course.

Culinary Arts Careers

Food Service Assistant – Fall or Spring Semester

EPC - 12:10 p.m.

(No articulated credit is available for this course.)

Students will acquire a basic knowledge of the skills required to perform a variety of tasks in a particular area of food service through hands-on learning. Skill development will meet industry standards at the entry level. The area of job-related social skills will be covered and reinforced on a daily basis.

Successful Student Profile

Students should be willing and able to participate in group activities, communicate with those around them, and work independently. Students should be interested in the food service industry as a possible career.

Areas of Study:

- Food sanitation and safety
- Identification and use of commercial equipment (both small and large)
- Following recipe procedures
- Weighing and measuring
- Following verbal and written directions
- Preparation and presentation of foods

Human Services Careers**Law Enforcement –Fall Semester****EPC – 10:00 a.m. and 12:10 p.m.**

This program is designed for students interested in law enforcement careers as a police officer, crime scene investigator, probation officer, etc. This program makes it possible for students to learn through very practical, hands-on training methods. Students will learn such things as crime scene investigations, police patrol procedures, fingerprinting, search warrant application and execution, and Minnesota State Laws and Criminal Code

Areas of Study:

- The history and evolution of law enforcement
- Criminals in history
- Crime, criminals, and victims
- U.S. Constitution and The Bill of Rights
- Evidence identification and collection
- Latent fingerprinting
- Crime scene investigation
- Case studies
- Officer survival
- Practical scenarios

Human Services Careers**Law Enforcement –Spring Semester****EPC – 10:00 a.m. and 12:10 p.m.**

This course continues the exploration into a career in law enforcement. Students will learn through hands-on training and practical scenarios such things as drugs and narcotics investigations, gangs and gang investigations, use of police dogs, and ethics in policing. Students will explore post-secondary law enforcement schools, employment with a law enforcement agency, and preparation for oral board panels. No prerequisites required.

Areas of Study:

- Police policy and procedures
- Gangs in the United States
- Homeland security
- Police Conduct
- Narcotics
- Search warrant and raid execution
- Specialized weapons and tactics (S.W.A.T.)
- Case studies
- Job search and oral board preparation
- Law enforcement programs

Health Careers	Health Careers
<p>Nursing Assistant – Fall Semester ONLY AHA CPR/First Aid – Fall Semester Only EPC - 10:00 a.m. and 12:10 p.m.</p> <p>This course prepares students for entry-level patient-care employment. Students will acquire skills in basic nursing, human-needs rehabilitation, and restorative services. Skills are practiced in a supervised laboratory and in a long-term care facility. Upon successful completion, students will be eligible to take the MN State Nursing Assistant Competency exam. Successful completion of this course requires 80 percent or higher scores on each written test, completion of all skill demonstrations, completion of ALL scheduled clinical hours, and 90 percent or better attendance in classroom and lab. A mantoux test within 90 days of clinical is required.</p> <p><i>Areas of Study:</i></p> <ul style="list-style-type: none"> • Resident rights • Safety and infection control • Death and dying • Nutrition • Personal care • Vital signs • Emergency procedures including CPR and First Aid • Mental health rehabilitation <p>Note: There is a lab fee for this course.</p>	<p>Health Careers – Spring Semester ONLY EPC – 10:00 a.m. and 12:10 p.m.</p> <p>This exciting course is for students interested in exploring a career in the medical field. In addition to career exploration students will also develop career goals, identify personal characteristics, learn medical terminology and be introduced to anatomy and physiology.</p> <p><i>Areas of Study:</i></p> <ul style="list-style-type: none"> • Medical terminology • Safety and infection control • Personal characteristics, legal and ethical responsibilities • Career job exploration: emergency medical careers, nursing/doctor, dental, dietary, radiology, biomedical engineering, medical laboratory, and medical office • Introduction to anatomy and physiology • Team member and leadership skills • Health Care Systems

Transportation Careers

Auto Body Repair – Fall Semester

EPC – 8:00 a.m., 10:00 a.m. and 12:10 p.m.*

This introductory course to auto body technology teaches non-structural repair, collision damage estimating, and refinishing. This is a skill-building course that starts students on their way towards becoming proficient in the auto body industry.

Areas of Study:

- Automotive refinishing
- Detailing
- Estimating
- Safety Practices

*Note: There is a lab fee for this course.

Advanced Auto Body Repair - Fall or Spring Semester (Instructor approval required)

EPC – 8:00 a.m., 10:00 a.m. and 12:10 p.m.

Students refine their skills in repairing today's technologically advanced cars that require knowledge of metals and plastics and proficiency in performing structural repairs using specialized equipment. Students will restore and refinish vehicles, using skills learned in class.

Areas of study:

- Frame repair
- Welding
- Metal finishing
- Painting
- Alignment of body components

(Prerequisite: Student must have completed both Fall and Spring Semester Auto Body Repair courses.)

Transportation Careers

Auto Body Repair – Spring Semester

EPC – 8:00 a.m., 10:00 a.m. and 12:10 p.m.*

In this course, students learn MIG welding, dent repair, and alignment of bolts on parts.

Areas of Study:

- Cutting and heating processes
- Welding
- Non-structural repair
- Disassembly, assembly, and alignment of bolt-on components
- Advanced welding project

*Note: There is a lab fee for this course.

Transportation Careers

Automotive Technology – Fall Semester EPC - 10:00 a.m. and 12:10 p.m.

Students learn basic automotive systems and begin mastering tools, techniques, and maintenance procedures regularly performed on automobiles. Students will perform work on donated vehicles or their own vehicles, and conduct repair and maintenance procedures on tires, steering, suspension, and electrical systems. In addition, students will acquire shop safety habits essential to work in an automotive service shop. Experiences include using on-line automotive resources similar to those at automotive service centers to find information on all mass-produced vehicles.

Areas of Study:

- Suspension and steering
- Automotive electrical systems

Note: There is a lab fee for this course.

Transportation Careers

Automotive Technology – Spring Semester EPC – 10:00 a.m. and 12:10 p.m.

This course continues the study of fundamental automotive theories and operating systems. Students learn about automotive brake systems through lecture and hands-on activities. Students will learn brake theory, diagnosis, and repair. In addition, basic engine theory, fuel injection, ignition, and engine performance will be covered. (Fall Semester is not a prerequisite for the Spring Semester course.)

Areas of Study:

- Brakes
- Engine theory
- Engine performance

Note: There is a lab fee for this course.

Transportation Careers	Transportation Careers
<p>Outdoor Motor Sports/Power Equipment I – Fall or Spring Semester EPC – 10:00 a.m. and 12:10 p.m.</p> <p>Students will learn how to maintain and repair ATVs, motorcycles, mini bikes, snowmobiles, personal watercraft, and small internal combustion engines used on power equipment such as lawn tractors, generators, trimmers, and leaf/snow blowers. Students will also learn engine maintenance, preventive care, problem solving, minor and major engine rebuilding, and how to achieve customer satisfaction. The curriculum focuses on skill building projects and troubleshooting. Students learn industry standards and current technology using both factory and after-market manuals and text.</p> <p><i>Areas of Study:</i></p> <ul style="list-style-type: none"> • Engine rebuilding • Repair and overhaul • Shop safety • Trouble-shooting techniques 	<p>Outdoor Motor Sports/Power Equipment II – Fall or Spring Semester EPC – 10:00 a.m. and 12:10 p.m.</p> <p>Students in this advanced course will focus on skill building, diagnostics, trouble-shooting, preventive care, and minor and major engine rebuilding. A large emphasis will be placed on time management which will include ordering parts, customer communications, invoicing, and computer skills. Electrical components, along with reading schematics and the repair of these items, will also be a component of this course.</p> <p><i>Areas of Study:</i></p> <ul style="list-style-type: none"> • Electrical components • Reading schematics • Repair and overhaul <p><i>(Prerequisite: Student must have passed Outdoor Motor Sports/Power Equipment I.)</i></p>

Information Technology	Information Technology
<p>Introduction to Technology Integration EPC – 10:00 a.m. and 12:10 p.m.</p> <p>The goal of this course is to introduce the technology enthusiast to the world of modern day technology. This course will provide entry level base knowledge in technology support.</p> <p>Mobile Apps, Social Media, and computer hardware/software standards for today’s fast-paced, ever-changing technology will be the focus of this class and will provide students with the skills needed to enter the technology industry workforce. The world of technology is ever evolving and this course will explore the changing technology landscape and how it effects people today and in the future.</p> <p>Students will receive classroom instruction as well as hands-on opportunities in the lab.</p> <p>This experience will allow students to make informed career decisions for the future, while providing them with a useful background of the technology industry.</p> <p>Areas of study:</p> <ul style="list-style-type: none"> • Fundamentals of IT support • Exploration of Google Certification • How to develop mobile Apps • Computer hardware repair and upgrades • Software upgrading • Internet and social media security and safety <p>Note: There will be a small lab fee.</p>	<p>Introduction to Technology Integration EPC – 10:00 a.m. and 12:10 p.m.</p> <p>The goal of this course is to introduce the technology enthusiast to the world of modern day technology.
